ACQUIRE.COM LISTING

Morph AI

Your always-on chief of staff. AI-powered calendar and task management — supporting documents for potential buyers.

Morph AI — Revenue Model & Pricing

Pricing Tiers

	FREE	PRO MONTHLY	PRO YEARLY
Price	$0/mo	$12.99/mo	$99/yr (~$8.25/mo)
Chat Messages	100/mo	2,000/mo	2,000/mo
Image/PDF Pages	10/mo	200/mo	200/mo
Audio Minutes	20/mo	200/mo	200/mo
Web Searches	2/mo	30/mo	30/mo
Batch Limit	3 items	Unlimited	Unlimited

Enterprise tier exists in codebase — unlimited everything, ready to activate.

Strategy

- Free tier hooks users (100 msgs = ~3/day)
- Batch limit of 3 drives upgrades — image extraction users hit the wall fast
- 36% yearly discount reduces churn
- Conservative vs competitors: Motion $34/mo, Reclaim $10/mo

Billing Infrastructure (Production-Ready)

```
Upgrade click → /api/billing/checkout → LemonSqueezy
→ Payment → Webhook (HMAC verified)
→ Subscriber record updated → Quota upgraded immediately
```

ENDPOINT	PURPOSE
`POST /api/billing/checkout`	Create checkout session
`GET /api/billing/status`	Tier + usage + remaining
`POST /api/billing/subscription`	Cancel / resume
`POST /api/webhooks/lemonsqueezy`	Lifecycle events

Full audit trail via BillingEvent table (tier transitions, amounts, metadata).

Quota Enforcement

Serializable transaction isolation — atomic, race-condition-proof:

```
1. Read user tier
2. Count usage since month start (UTC)
3. If within limit → allow + log
4. If over limit → deny
5. Commit atomically
```

Unit costs configurable via env vars — no code changes needed.

Unit Economics

TIER	REVENUE	VARIABLE COST	NET MARGIN
Free	$0	~$0.30	-$0.30
Pro Monthly	$12.99	~$1.22 (incl. LS fee)	**$11.77 (90.6%)**
Pro Yearly	$8.25	~$0.99	**$7.26 (88.0%)**

Revenue Upside

1. **Price increase** — $12.99 → $19.99 still below Motion ($34)
2. **Enterprise tier** — already in codebase, ready for B2B
3. **Team tier** — designed at $15/user/mo (3-user min)
4. **API productization** — sell calendar parsing pipeline standalone
5. **Annual conversion** — lock revenue, reduce churn
